Whitepaper 2023
NFTouring
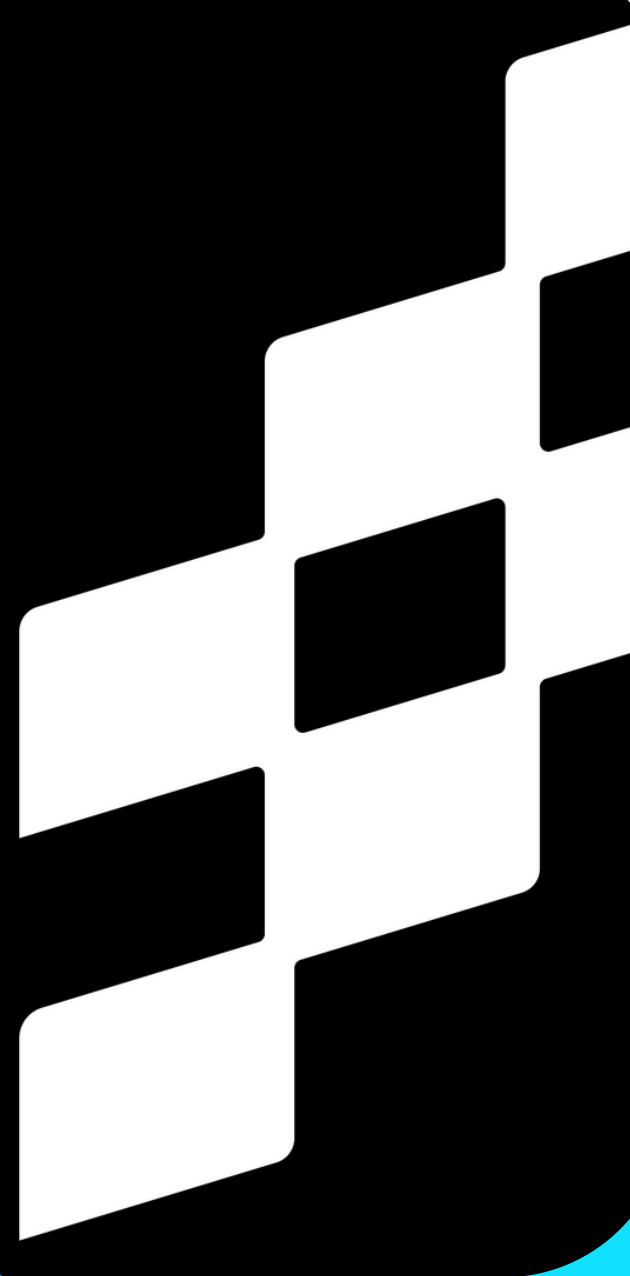

Warning

ROAD TO EARN

« Through NFTouring, we want to create links between car and gaming enthusiasts, to continue to build a lasting community in a daily life cadenced by this frantic and addictive game. We will achieve this through:

- An excellent video game, where no aspect is neglected, for a unique experience.

- A social network where you are rewarded for sharing your passion.

- The care of our community: you have full ownership of your assets, your opinion actively participates in the growth of NF Touring.

- A solid and sustainable ecosystem where all players can earn crypto assets, prestigious vehicles, or invitations to events around the world. »

Emmanuel Beguier

FONDATEUR

La FRENCH TECH

THE PROJECT

NFTouring is the result of 5 car enthusiasts who wanted to gather a community sharing the same passion around a superApp. To do so, they decided to create a captivating social network where everyone can win but also a video game inspired by a very famous card game. NFTouring is a mobile racing game combined with a revolutionary playing cards game, using blockchain technology, allowing to gather players around a decentralized economy that will be redistributed to them.

NFTouring is created by enthusiasts for enthusiasts. That's why we offer the possibility to contribute to the future of the project, to future events of the game, but also to exchange between members of the community thanks to our social network directly accessible from the application.

Our play-and-earn game uses a special deck of cards that includes speed, attack and defense cards.

Start your engines and may the best man win! Get ready to compete in legendary tournaments and grand prizes to win tokens and upgrades for your car.

Take your chance to participate in live events and competitions, which will allow you to win multiple rewards such as "supercars" whose keys will be given to you during dedicated events, NFTouring tokens, exclusive NFTs to collect and many others...

Take on several weekly challenges to build your dream supercar collection.

**NFTouring promises you an epic and unique experience.**

Our mission :

NFTouring's mission is to create links between car enthusiasts and gamers. We want players to be able to connect and interact in an incredible world, inspiring them to build a growing and lasting community in a day-to-day life that is driven by this addictive and fast-paced game.

This mission is possible because it is based on the following foundations:

- Community: we want our members to have full ownership of their assets and for their comments and suggestions to contribute to the growth of NFTouring. A social network where everyone wins by sharing their passion.

- A strong ecosystem: we aim to provide a fair, balanced and transparent ecosystem where all players are encouraged to play to win crypto assets, premium vehicles or invitations to events around the world.

- Great Gameplay: As game enthusiasts, we leave no stone unturned and are committed to creating an absolutely amazing gaming experience.

- Longevity: NFTouring aims to provide every player with the opportunity to enjoy a unique experience in a sustainable context.
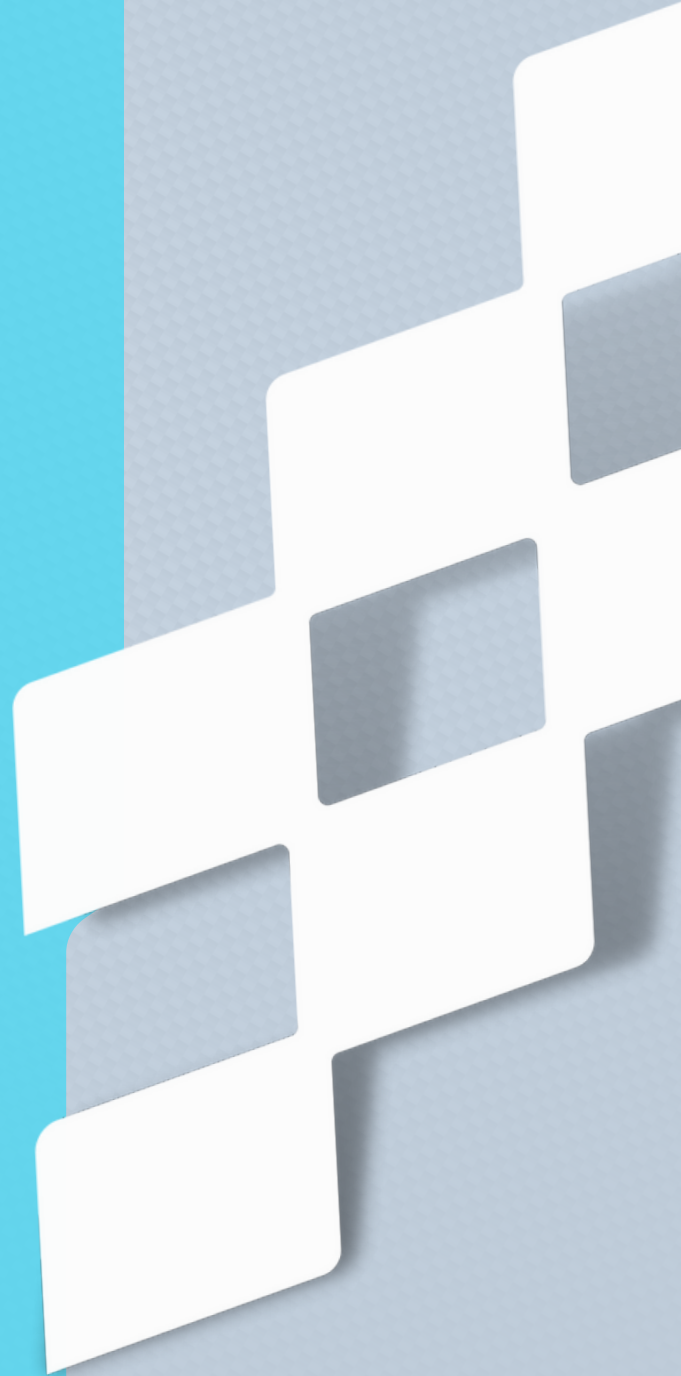

02 : THE GAME

Touring – Board game 1906

Game "Gran Turismo 7" 2022
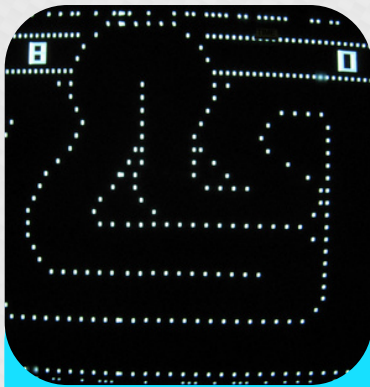

Game "Gran Trak 10" 1974

For a very long time cars and gaming are linked, the oldest will remember "Gran Trak 10" and the youngest "Gran Turismo". But do you know "Touring", a famous board game from the 1900s...

With NFTouring, our ambition is to bring together the largest community of motorsport enthusiasts around the spirit of this game to which we bring new perspectives by providing a social network but also a unique metaverse where everyone can enjoy their passion and enjoy many benefits.

THE GAME

NFTouring is the first automotive card game based on the blockchain. It is powered by a special deck of cards that includes speed, attack and defense cards, among others.

Compete against several people from all over the world in real time in wild races full of pitfalls, beware of your opponents who will not hesitate to put obstacles in your way to steal your title of the best driver in NFTouring.

Get ready to compete in legendary tournaments and grand prizes to win tokens and upgrades for your car. Grab your chance to compete in live events and never-before-seen competitions, where you'll be able to win a variety of rewards including supercars, NFTouring tokens, exclusive NFTs to collect and more...

*Unofficial prototype

Take on several weekly challenges to build your collection of dream supercars.

Our game mechanics allow everyone to come and play throughout the day, but beware that some races require a high level of assiduity in order to claim the podiums.

Start your engines and may the best one win !

PARIS

MONACO

LONDON

RUNS :

The cornerstone of NFTouring is the races!

They will allow you to win tokens, boxes filled with gifts but also unique advantages!

Our races are divided into 3 categories:

- The classics: several hours of racing - 6 cards at the start, the player comes back to draw new cards as soon as he has "fuel" (energy of the game) in his possession. Only one mission: to be the fastest! These races will allow the players to gain in level but also to win many tokens.

- Runs: Each player plays in turn by turn up to 5 players! Runs allow players to improve their stats but also their level.

- Grand prizes: exciting events over several days! Be at the top of the leaderboard to win many gifts including a beautiful sports car. Reach the first place in the quarterly ranking to get many gifts.
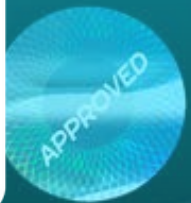

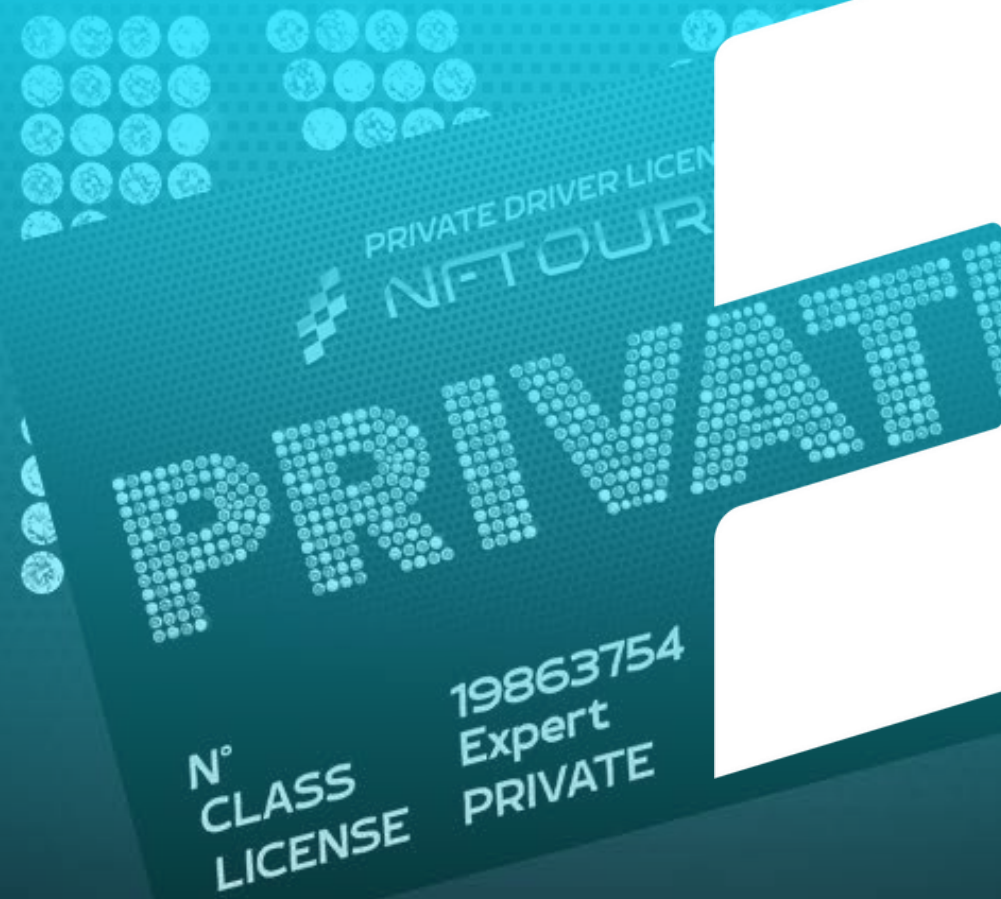

LICENSES

Licenses use NFT technology.

They give you access to many advantages throughout the NFTouring adventure.

You can't start an engine without a license... but don't panic, you'll be able to buy them during drops on our marketplace but also earn them directly in the game by winning in the dedicated races.

Private Driver License

Private License Benefits:

- "In Real Life" prizes: several real supercars to be won per year, the first one worth 290,000 Euros, as well as prestigious watches, international travel. VIP invitations to NF Touring events, invitations to related automotive events.

- Digital prizes: 1 vehicle + 1 mythical covering. Air-drops of tokens and NFTs, privileged access to future drops of NF Touring and its partners.

- NFTouring application: Entry into the game in the best conditions. High level of potential rewards. Access to the "Private" community of the social network and its benefits.

GOLD Driver License

Gold License Benefits:

- "In Real Life" Awards: Numerous prestigious prizes to be won throughout the year, as well as international travel. Invitation to NFTouring and related automotive events.

- Digital prizes: 1 vehicle + 1 exclusive covering. Air-drops of tokens and NF Ts, privileged access to future drops from NFTouring and its partners.

- NF Touring application: Entry into the game in the best conditions. High level of potential rewards. Access to the community "Gold" of the social network and its benefits.

SILVER Driver License

Silver License Benefits:

- "In Real Life" prizes: Prestige watches to be won throughout the year, as well as select trips. Invitation to NFTouring events.

- Digital prizes: High chances to win 1 Private License. 1 vehicle + 1 special covering. Air-drops of tokens and NFTs.

- NF Touring application: Entry into the game in good conditions. Access to the rewards system.

04 : GAMEPLAY

GAMEPLAY

The player registers for a race according to his level, his license and his available vehicles.

He logs in at the start and receives 6 random cards which can be speed points, safetys or warning cards.

The player can use the number of cards allowed by the rules of the game mode in order to improve his speed, to help himself, to attack an opponent or just to throw some away.

The power-up cards collected from the boxes or from the marketplace can be used only once to protect against specific breakdowns. If the player uses a speed card, he places it in the center of the screen and sees his number of points add up according to his card, the statistics of his vehicle and his driver in play.

If the player decides to help himself, he places the card on the attack he has suffered.

If he decides to attack an opponent, he places the card in the center of the screen.
This will open a menu for him to select the vehicle to attack, which can be the opponent in front or behind him.

Depending on the game mode of the race, the player can draw new cards according to his available energy or return to a specific time. The race stops when the time is up or when the number of points is reached (depending on the game mode).

The deck strategy is at the heart of the gameplay of NFTouring.

Each player must compose their own deck of cards to overcome the different obstacles of the circuit and win the race.

The choice of cards in the deck is crucial because it can influence the course of the race. Speed cards allow players to travel the track more quickly, while special cards offer advantages such as repairs or attacks against other drivers.

To win, players must adapt their strategy according to the circuit and their opponents.

By using the right cards at the right time, they can gain an advantage over their competitors and cross the finish line first.

The deck strategy offers an additional strategic dimension to the gameplay of NFTouring, allowing players to customize their gaming experience and develop their own racing style.

In NFTouring, adapting your racing strategy to the different sections of the circuit is essential to win races. Indeed, each section of the circuit presents its own challenges and opportunities that require an adaptation of your racing strategy.

For example, if a section of the circuit has many tight corners, you will need to use low speed, braking, and stability cards to keep your car on the track and avoid going off track, which slows down your progress.

Conversely, if a section of the circuit is straight and favors speed, you will need to use speed cards to accelerate and overtake your opponents.

By understanding the different sections of the circuit and using the right cards at the right time, you can optimize your race time and increase your chances of victory.

The racing strategy is therefore a key element of NFTouring that strengthens the strategic aspect of the online racing game.

THE TEAMS

The concept of a "team" is becoming increasingly popular among fans of influencers. Joining your favorite influencer's team will not only allow you to defend their colors and show your support, but it will also give you access to exclusive content that is not available to fans who are not members of the team.

But that's not all ! By being part of the team, you'll also be able to participate in exclusive meet-and-greets with the influencer, as well as special events hosted by them. These events can include meet-and-greets with the influencer, previews, special parties, and more.
As if that weren't enough, by being a member of the team, you can also win a number of giveaways, which are often offered at these special events.

These gifts can include exclusive products, accessories, tickets to concerts or shows, and much more.
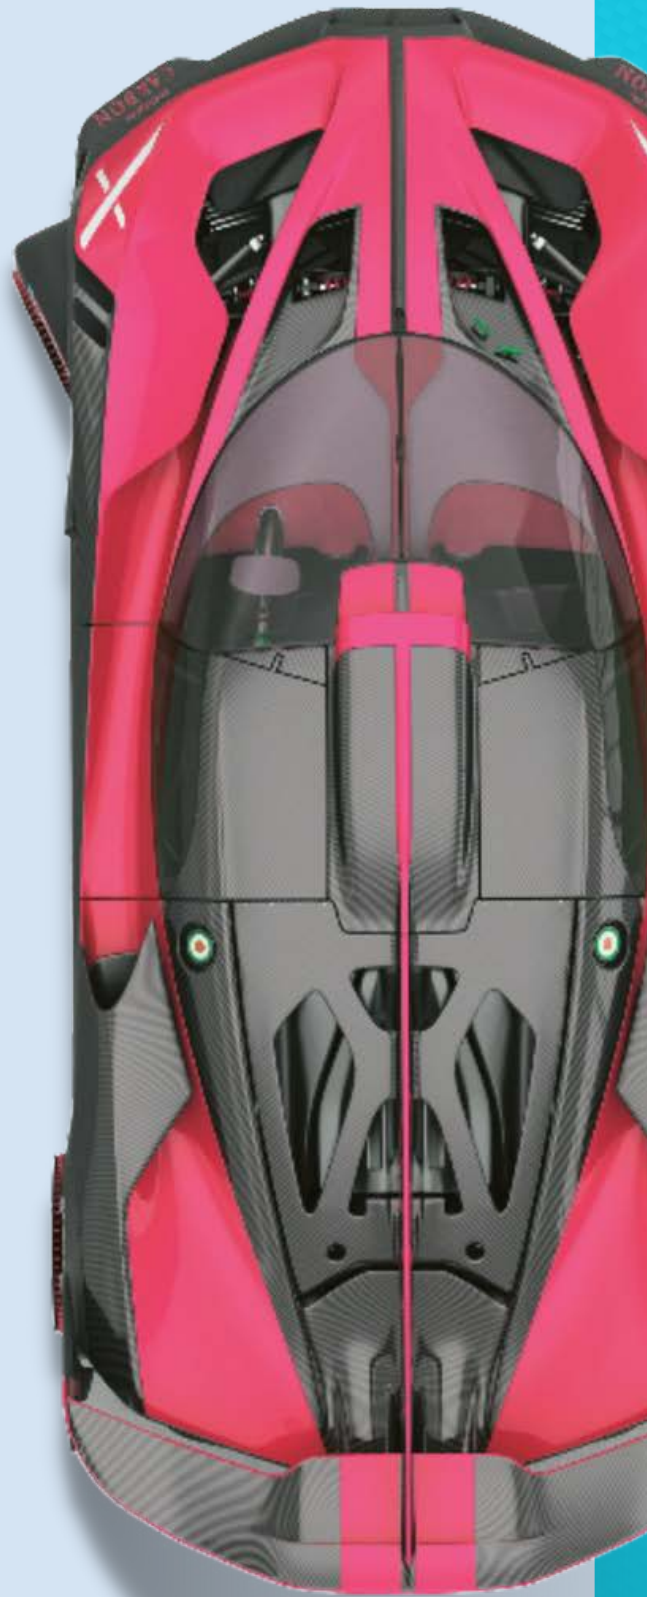

CARS

NFTouring vehicles allow access to races according to their level and rarity.

Some endurance races require you to own multiple vehicles. Each car has three different statistics depending on its rarity: vehicle handling, maximum speed and acceleration.

The statistics are evolving thanks to the different elements of customization of the vehicle like the coverings, the rims or the improvements of performances. The statistics allow you to obtain a multiplier on your "speed cards" but also to avoid certain obstacles more easily thanks to the vehicle's maneuverability.

The cars in the game are Nfts so you will have the possibility to keep them in your digital wallet in order to use them in the universes of our future partners but also to resell them on the secondary markets.

THE GARAGE

In NFTouring, your garage is crucial to your success on the track. This is where you can store all your assets and prepare your car for the upcoming races.

In your garage you can store all your NFTs of cars, parts and accessories. These NFTs represent your assets in the game, and each one is unique and has its own features and benefits.
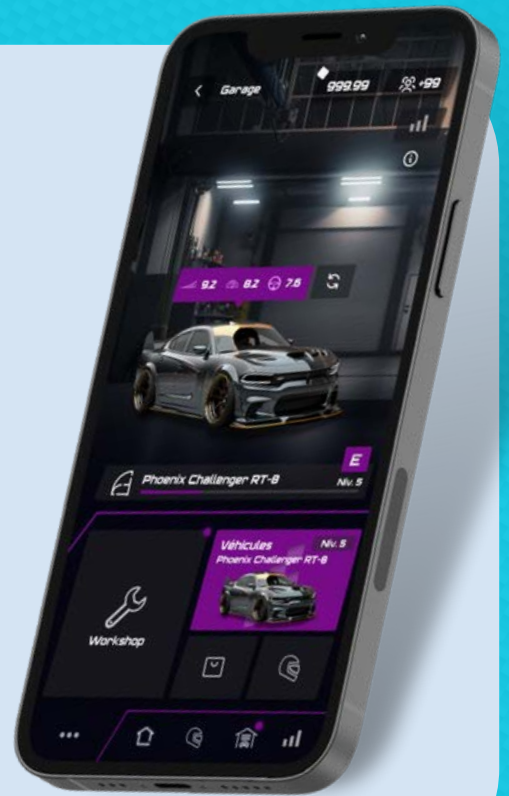

CUSTOMIZATION

Customizations bring changes to your in-game stats. In addition to their basic features they also have different rarity levels.
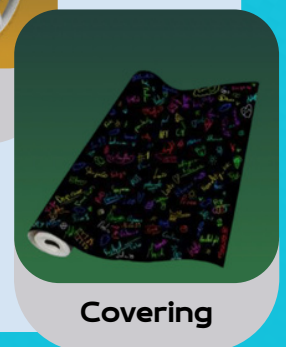

Customizations are NFTs that belong to you. You can therefore resell them on the marketplace and secondary markets.

THE TOKEN

NFTR is the official token of the NFTouring universe. It is based on the ERC20 token standard, which is a widely used token standard on the Ethereum blockchain.

NFTR will be hosted on the Polygon blockchain, which is a layer 2 blockchain built on Ethereum. One of the main reasons for this decision is to reduce the environmental footprint and gas costs, which will allow users to transact at a lower cost and with increased energy efficiency.

The ERC20 protocol offers secure and accessible programming for major crypto exchanges. It is also compatible with most Ethereum wallets, making it easy to integrate NFTR into existing crypto-currency ecosystems.

The total number of NFTR tokens in circulation will be 4 billion, catering to the multiple uses planned for the token.

These uses may include payment transactions, user rewards, governance mechanisms and more.

Use of the NFTR token:

DeFI :

- Buy/Sell
- Stacking with interest
- Lending protocol (loan guaranteed by NFTS)

Play-and-earn:

- Purchase of vehicles and drivers
- Purchase of customizations
- Race participation fees
- Upgrades to vehicles, vehicle and driver levels
- Access to in-game bonuses
- Purchase of booster packs
- Access to private modes
- Reset of the wear and tear rate

SocialFi :

- Right to vote in the community
- Additional interaction rights with premium users of the social network
- Reward for using the social network

Other :

- Purchase of real vehicles
- Purchase of NFT collectibles
- Purchase of merchandising
- Purchase of private video content

THE TOKEN

The NFTR token is the hidden gem of the NFTouring platform. This native token of the platform is used to make transactions and to buy and sell NFTs on the dedicated marketplace.
But that's not all, players can also earn NFTR tokens based on their performance in the multiplayer races.

The NFTouring ICO is a unique opportunity to invest in the growth potential of this innovative project. With the NFTR token, you can participate in a decentralized economy and have full ownership of your assets on the platform. You can also exchange your NFTR tokens for other cryptocurrencies or fiat currency.

By carefully reading NFTouring's whitepaper, you can learn about the features and benefits of the NFTR token, as well as the platform's plans for its distribution and use.
Investing in NFTouring and the NFTR token could be a lucrative opportunity for savvy investors who are willing to take risks.

However, it is important to do your due diligence, understand the potential risks and rewards, and never invest more than you can afford to lose.

THE NOMINAL VALUE :

The face value of NFTouring's NFTR token is set at 0.10 Euro. However, it should be noted that this value does not necessarily reflect the actual price of the token, which may vary depending on market demand and other factors.

It is important to note that this price is the price set at the time of the initial sale of the NFTR token on the application when it was released to the general public.

ISSUE PRICE:

The Issue Price of the NFTR offered to the public within the framework of the Public Offering of NFTouring is fixed as follows in relation to the Nominal Value
0.10 euro:

- Private Sale: 0.01 euros, i.e. a discount of 90%.

- Round 1 public : 0.03 euros, i.e. a discount of 70%.

- Round 2 public : 0.05euros, i.e. a discount of 50%.

EMISSION THRESHOLD :

The Minimum Subscription Threshold for the NFTR ICO is set to make the investment accessible to as many people as possible and to encourage commitment to the NFTouring project.

The Minimum Subscription Threshold is set according to the Round at :

Private Sale: Minimum Purchase 500€ / Maximum Purchase 20000€.

Round 1: Minimum Purchase 250€ / Maximum Purchase 10000€.

Round 2: Minimum Purchase 100€ / Maximum Purchase 5000€

Please note that these amounts are in Euros.

Currencies and Crypto-currencies (Digital Assets) accepted :

Currencies:

The accepted currencies are Euro (code EUR) and Dollar (code USD).

Digital Assets:

Crypto-currencies accepted are Bitcoin (code: BTC), Ether (code: ETH), USD Tether (code: USDT), USDCoin (code: USDC) and Matic (code: MATIC).

Exchange parities with NFTR Currencies

The exchange parity for the pair [USD-NFTR] is equal to the applicable Issue Price.

The exchange parity for the digital assets is determined by the exchange rate in force on the closing date of the Public Offering of NFTR, multiplied by the applicable Issue Price.

ALLOCATION OF FUNDS :

NFTouring is an ambitious company that aims to provide a superior gaming experience for automotive and gaming enthusiasts.

To achieve this goal, it is essential to invest the funds and cryptocurrencies raised during the Public Offering in an efficient manner.
For this, the allocation of funds is divided into seven categories, each with its respective percentage.

First, there is business development, which accounts for 20% of the total allocation. This includes expenses related to the deployment of the NFTouring platform on a large scale and the expansion of the services offered.
Second, there is the technology category which also accounts for 20% of the total allocation. This category includes expenses for the IT developments required for the NFTouring platform and the expansion of its services, as well as the necessary IT licenses and hardware.

The recruitment category represents 20% of the total allocation. This includes salaries, benefits and expenses to support the growth of the platform's business.

The governance category represents 10% of the total allocation. It includes salaries, benefits and expenses to implement the governance of NFTouring, which involves about thirty participants.
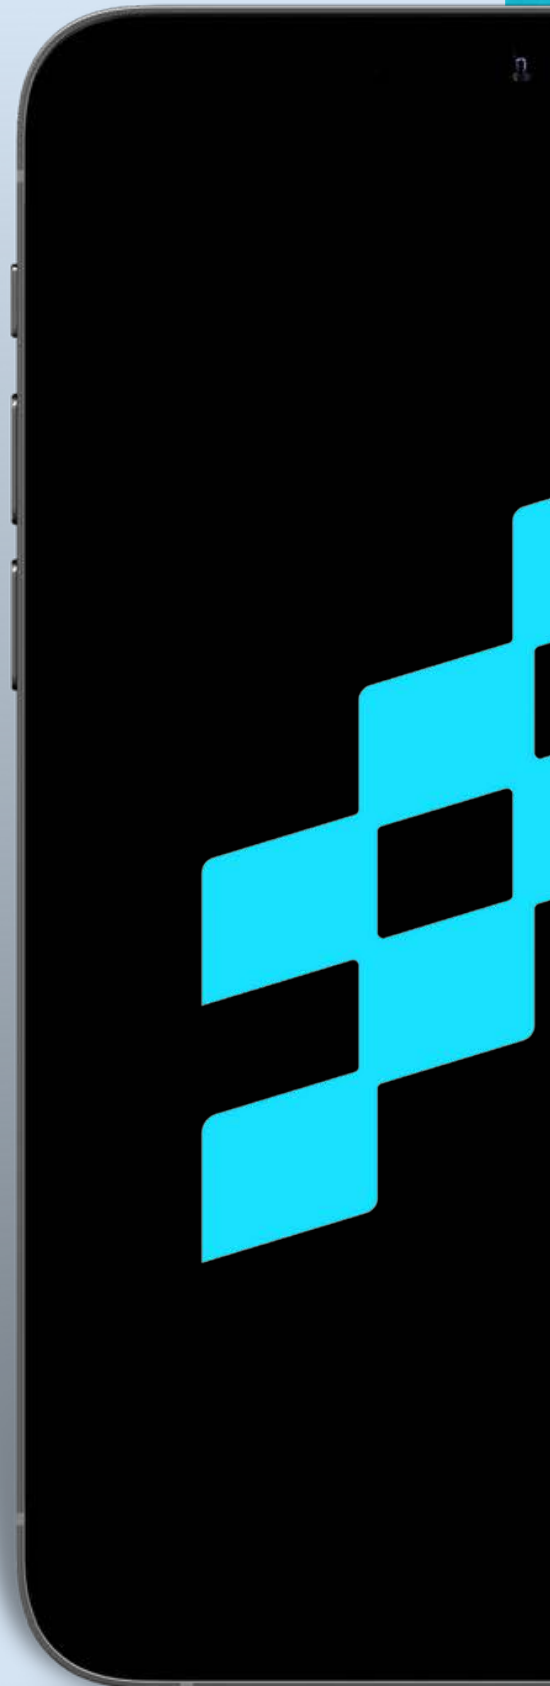

The marketing and communication category represents 15% of the total allocation. This includes salaries, benefits and expenses to promote and enhance the NFTouring platform and its services.
The legal category represents 10% of the total allocation.

This includes salaries, benefits and expenses to implement the legal administration and security of NFTouring.

Finally, the project management category accounts for 5% of the total allocation.

This includes salaries, benefits and expenses for managing NFTouring.
Each allocation category has been carefully designed to support the growth and expansion of the business while ensuring an exceptional gaming experience for users.

Note that the allocation of funds and cryptocurrencies raised during the NFTouring Public Offering may be changed at any time by the NFTouring team
This change will be communicated to investors and will reflect the company's current needs to achieve its long-term goals.

The NFTouring team is committed to maintaining full transparency on the use of funds and cryptocurrencies raised and investing them responsibly to ensure the growth and sustainability of the NFTouring platform.

VESTING / CLIFF :

One of NFTouring's key objectives in ensuring the success of the project is to maintain the stability of the token price after the ICO.

To this end, we have implemented a "cliff" process, which blocks the use of tokens for a set period of time, as well as a "vesting" process, which allows for a staggered release of tokens.
We have optimized these conditions for each contributor in order to harmonize NFTouring's global strategy.
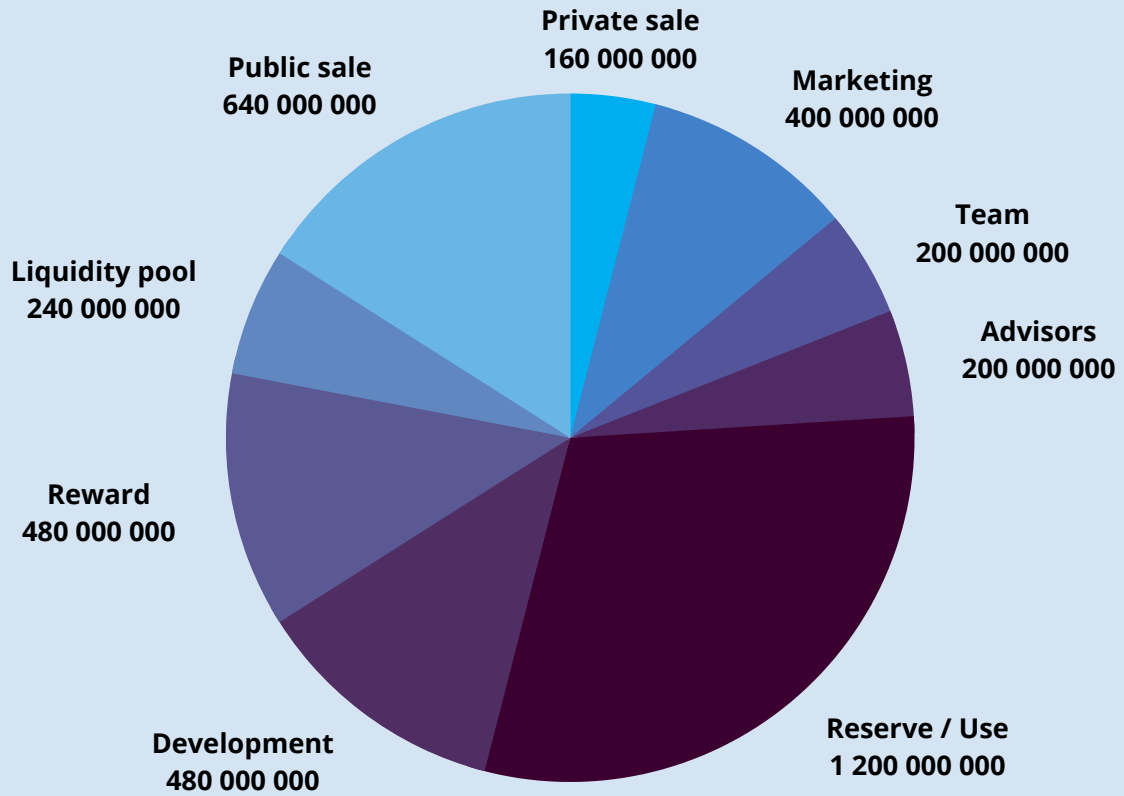

Moreover, we have thought about these "vesting/cliff" conditions to favor a sufficient provisioning of the supply according to the different profiles of contributors, which will allow to maximize the "farming" program that we will set up.

In short, we have put in place a solid strategy to maintain the stability of the token price and ensure the success of NFTouring. We are confident that this optimized approach to
"We are confident that this optimized approach to vesting/cliff terms will meet the needs of all contributors and maximize the benefits of the farming program.

TOTAL :	100%	4 000 000 000

ICO :

PRIVATE SALE :

- 2% TGE, Cliff 12 months, then linear 18 months

PUBLIC SALE :

- 10% TGE, Cliff 6 months, then linearly 18 months

MARKETING :

- 6% at TGE, then linear vesting over 32 months

TEAM / ADVISORS :

- Cliff 18 months, then linear vesting over 25 months

RESERVE AND USE :

- 5% TGE, then linear 36 months

DEVELOPMENT:

- 10% TGE, Cliff 6 months, then linearly 18 months

REWARDS :

- 1% TGE, then linear 36 months

N°1 :

- A first level of sale at 0.010 cts/token for private buyers with a minimum investment of 500€ and a ceiling of 20 000€ with 2% TGE, lock-up 12 months, then linear 18 months.

    HARD C/P: 160 000 000 NFTR

N°2 :

- A second level of sale at 0.03 cts/token for public buyers with a minimum investment of 250€ and a ceiling of 10 000€ with 10% TGE, lock-up 6 months, then linear 18 months.

    HARD C/P: 320 000 000 NFTR

N°3 :

- A third level of sale at 0.05 cts/token for public buyers with a minimum investment of 100€ and a ceiling of 5000€ 10% TGE, lock-up 6 months, then linear 18 months.

    HARD C/P: 320 000 000 NFTR

FEES :

As part of NFTouring's decentralized economy, a 5% transaction fee will be charged on all sales of NFTs made on the platform's marketplace, Grand Prix participation fees, and for other future items on the platform.

Of this fee, 55% will go to players in the form of rewards for participation and stacking, while 40% will be used to support the NFTouring ecosystem and fund its development.

Finally, 5% of the fee will be automatically burned to reduce the total supply of NFTR tokens and thus maintain its value. These fees are designed to support the NFTouring ecosystem and fund its continued development, while providing rewards for players and ensuring a fair and sustainable economy for all participants.

BURN :

For our NFTouring game, the "burn" process is an essential part of our decentralized economy. This innovative process maintains the value of our NFTR token while supporting the continued development of the platform and its ecosystem.

When an NFT sale is made on our marketplace, 5% of the fee is automatically removed from circulation and "burned."
This "burn" approach creates scarcity and increased value for the remaining NFTR tokens, meaning investors can expect to see an increase in the value of their investment over time.
The "burn" process is an exciting innovation for investors, as it creates upward pressure on the value of our NFTR token, while supporting the continued development of the platform and its ecosystem. We are excited to offer this innovative approach to the NFTouring community and look forward to seeing the value of our NFTR token continue to grow over time.

PARTNERSHIP :

One of the unique aspects of the NFTouring platform is the ability for advertisers to sponsor events or competitions, or offer special rewards for players. This opportunity allows advertisers to connect directly with the NFTouring community and promote their products or services to an engaged audience of gaming and automotive enthusiasts.

In exchange for their support, advertisers can gain exposure to a qualified and passionate audience, which can increase demand for their products and services.

Special rewards for players can also increase player engagement with the platform, encouraging participation and building community. This can also contribute to the financial viability of NFTouring, creating additional revenue streams for the platform.

Advertisers can purchase on-intrusive, privacy-friendly in-game advertising space, sponsor events or competitions, or offer special rewards for players.

These additional revenue streams can help fund the ongoing development of the platform, while providing benefits for both advertisers and players.

ROADMAP

1st semester 2022

- Development of the concept
- Prototyping of the social network

July / August 2022

- Prototyping of the video game
- Elaboration of the economic model

September 2022

- Lancement de la communication du projet
- Élaboration des tokenomics
- Intégration des advisors
- Élaboration graphique

END OF 2022

- Launch of the NFT Genesis campaign
- Creation of the private community
- Development of the Smart Contract
- Launch of the website
- Sale of Private Driver License

1st quarter 2023

- Launch of the communication campaign
- Launch of the beta tests for the owners of the game
- Genesis and NFTs Gaming S1
- Creation of the in-app marketplace
- Launch of the ICO
- Launch of the "GOLD" license

2nd quarter 2023

- Presentation of the new modes
- Launch of the Genesis Cup
- New Genesis Calendar
- Stacking

3rd quarter 2023

- Introducing the new modes
- New Genesis calendar
- Sale and airdrops of NFTs S2
- Launch of landing and car rental.

2024

- Development of the metaverse, the social network and much more to come...
